EYEGLASSES RED / GREEN

Mod. 40.15.04

Eyeglasses for Hess examination, with red and green polarized lenses to selectively filter light spots projected on the screen.

The glasses are made of plastic material, extremely light and with an anatomical shape that adapts to any patient profile, moreover they are easily superimposable on any eyeglasses worn by the patient. The lenses are washable with water and a normal detergent with a soft cloth.

Orderable on the site www.fgesnc.com spare parts section.
